

DATA BREACH REPORTS

January 31, 2019

The ITRC Data Breach Report, and supplemental documents, are brought to you by CyberScout. We would like to thank CyberScout for their continued financial support.

CONTENTS

Information & Background on ITRC	3
Methodology	4
ITRC Breach Category Summary	5
ITRC Breach List	6

The ITRC Data
Breach Report is
sponsored by:

CyberScout delivers a comprehensive suite of breach mitigation and identity management solutions to empower you to:

- Reduce your risk of a data breach occurring
- React swiftly and appropriately in the event a breach happens
- Manage the reputation of your organization and of those affected by the breach

Visit www.CyberScout.com or call 888.682.5911 today to learn more.

Identity Theft Resource Center would like to thank **CyberScout** for their continued financial support.

Information and Background on ITRC

Information management is critically important to all of us - as employees and consumers. For that reason, the Identity Theft Resource Center has been tracking security breaches since 2005, looking for patterns, new trends and any information that may better help us to educate consumers and businesses on the need for understanding the value of protecting personal identifying information.

What is a breach? The ITRC defines a data breach as an incident in which an individual name plus a Social Security number, driver's license number, medical record or financial record (credit/debit cards included) is potentially put at risk because of exposure. This exposure can occur either electronically or in paper format. The ITRC will also capture breaches that do not, by the nature of the incident, trigger data breach notification laws. Generally, these breaches consist of the exposure of user names, emails and passwords without involving sensitive personal identifying information. These breach incidents will be included by name but **without** the total number of records exposed in the cumulative annual total.

There are currently two ITRC breach reports which are updated and posted on-line on a weekly basis. The *ITRC Breach Report* presents detailed information about data exposure events along with running totals for a specific year. Breaches are broken down into five categories, as follows: business, banking/credit/financial, educational, Government/Military and medical/healthcare. The *ITRC Breach Stats Report* provides a summary of this information by category. Other more detailed reports may be generated on a quarterly basis or as dictated by trends.

It should be noted that data breaches are not all alike. Security breaches can be broken down into a number of additional sub-categories by what happened and what information (data) was exposed. What they all have in common is they usually contain personal identifying information (PII) in a format easily read by thieves, in other words, not encrypted.

The ITRC currently tracks seven categories of data loss methods: Insider Theft, Hacking (which includes Spearphishing, Ransomware, and Skimming), Data on the Move, Employee error/Negligence/Improper disposal/Lost, Accidental web/Internet Exposure, Physical Theft and Unauthorized Access. (Please note that Accidental email, previously included with Accidental web/Internet Exposure, has been re-categorized under the Employee error/Negligence/Improper disposal/Lost category.) Subcontractor/Third Party/BA is included here but is combined with one of the above. In these, as well as some other breaches, there may be more than one category checked.

The ITRC breach list also tracks types of information compromised:

- Social Security number
- Credit/Debit Card number
- Protected Health Information (PHI)
- DMV Records
- Financial Accounts
- Email/Password/User Name
- Other/Undefined Type of Records

Methodology

The ITRC breach list is a compilation of data breaches confirmed by various media sources or notification lists from state governmental agencies. This list is updated daily, and published each Tuesday.

Breaches on this list typically have exposed information which could potentially lead to identity theft, including Social Security numbers, financial account information, or medical information. ITRC follows U.S. Federal guidelines about what combination of personal information comprise a unique individual, and the exposure of which will constitute a data breach.

Records Reported:

This field has been changed to more accurately reflect the circumstances surrounding the number of records exposed. The numeral "0" has been replaced with "Unknown" - recognizing the number of records may have been reported to some other entity (i.e. government or law enforcement), but is not provided in the information available to the ITRC.

Breach categories:

Business: This category encompasses retail services, hospitality and tourism, professional, trade, transportation, utilities, payment processors and other entities not included in the other four sectors. It also includes nonprofit organizations, industry associations, non-government social service providers, as well as life insurance companies and insurance brokers (non-medical).

Education: Any public or private educational facility, from pre-school through university level. This category does not include scholarship providers, after school entities, or tutoring organizations.

Medical/Healthcare: Any medical covered entity (CE) or business associate (BA), as defined by HIPAA, in the healthcare industry. Also includes healthcare facilities and organizations which may be attached to schools and universities, and *may* include pharmaceutical manufacturers. Insurance companies may vary by industry – medical and long term insurance providers will be classified as medical healthcare. (Included on hhs.gov list).

Covered entities are defined in the HIPAA rules as (1) health plans, (2) health care clearinghouses, and (3) health care providers who electronically transmit any health information in connection with transactions for which HHS has adopted standards.

A "business associate" is a person or entity that performs certain functions or activities that involve the use or disclosure of protected health information on behalf of, or provides services to, a covered entity.

Government/Military: Any city, county, state, national or military entity; or a department within one of these entities. In the event that a medical facility is also a government or military entity, it will be listed under Government/Military. Entities such as Veteran Association Medical Centers (VAMC) will be included in this sector.

Banking/Credit/Financial: This sector includes entities such as banks, credit unions, credit card companies, mortgage and loan brokers, financial services, investment firms and trust companies, payday lenders and pension funds (401 savings plans)

Identity Theft Resource Center

2019 Category Summary

How is this report produced? What are the rules? See below for details.

Report Date: 2/5/2019

Totals for Category: Banking/Credit/Financial	# of Breaches: 6	# of Records: 111,589
	% of Breaches: 7.0%	%of Records: 30.2%
Totals for Category: Business	# of Breaches: 36	# of Records: 12,000
	% of Breaches: 41.9	%of Records: 3.2%
Totals for Category: Education	# of Breaches: 5	# of Records: 4,024
	% of Breaches: 5.8%	%of Records: 1.1%
Totals for Category: Government/Military	# of Breaches: 10	# of Records: 1,002
	% of Breaches: 11.6	%of Records: 0.3%
Totals for Category: Medical/Healthcare	# of Breaches: 29	# of Records: 241,412
	% of Breaches: 33.7	%of Records: 65.2%
Totals for All Categories:	# of Breaches: 86	# of Records: 370,027
	% of Breaches: 100.0	%of Records: 100.0%

2019 Breaches Identified by the ITRC as of: 2/5/2019

Total Breaches: 86
Records Exposed: 370,027

The Identity Theft Resource Center breach database is updated daily and published to our website weekly. A US-based breach, as identified by our current process, is considered public when one of these occur:

1) Published by a credible source (sources include Offices of the Attorney General, and established media – TV news, radio, newspapers)

2) A letter notifying a potential victim has been received

ITRC will provide attribution of the source and include the relevant data to the extent that has been made public in our findings. If the number of records is not made publicly available, ITRC will note that in the report as “unknown” indicating we do not have the specifics of the actual number impacted. Identity Theft Resource Center reserves the right to make an educated estimate to the potential of impact based on our knowledge and understanding of the specifics of the policies of the reporting entity.

The ITRC would like to thank CyberScout for its financial support of the ITRC Breach Report, ITRC Breach Stats Report and all supplemental breach reports.

2019 Breach List: **Total Breaches:** **86**
Records Exposed: **370,027**

2019 Breaches Identified by the ITRC as of:	2/5/2019
--	-----------------

Total Breaches:	86
Records Exposed:	370,027

The Identity Theft Resource Center breach database is updated daily and published to our website weekly. A US-based breach, as identified by our current process, is considered public when one of these occur:

1) Published by a credible source (Sources include Offices of the Attorney General, and established media – TV news, radio, newspapers)

2) A letter notifying a potential victim has been received

ITRC will provide attribution of the source and include the relevant data to the extent that has been made public in our findings. If the number of records is not made publicly available, ITRC will note that in the report as “unknown” indicating we do not have the specifics of the actual number impacted. Identity Theft Resource Center reserves the right to make an educated estimate to the potential of impact based on our knowledge and understanding of the specifics of the policies of the reporting entity..

The ITRC would like to thank CyberScout for its financial support of the ITRC Breach Report, ITRC Breach Stats Report and all supplemental breach reports.
